A LEGACY OF INNOVATION

GAMO® DNA

BORN IN BARCELONA, SPAIN 1955

HERITAGE
WORLD-CLASS
GREEN MANUFACTURING
INDUSTRY LEADERS

RESEARCH & DEVELOPMENT
QUALITY
ACCURACY

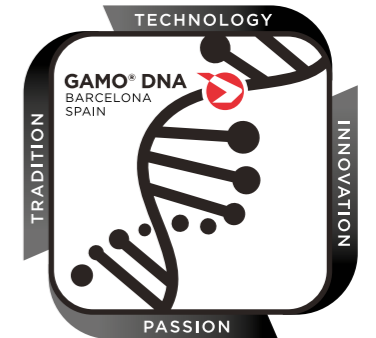

For more than 60 years, Gamo has been designing and manufacturing world-class air rifles, air pistols and air gun ammunition for small game hunting, competition, recreation and pest control.

Today, Gamo rifles are sold in more than 90 countries with offices in the USA, UK, Spain and Mexico. A truly iconic brand, Gamo delivers the finest products and the latest technology supported by unparalleled customer support and interaction.

THE DIFFERENCE IS OUR DNA

- Fully integrated manufacturing
- Repeated test firing
- Exhaustive quality control procedures
- Automotive-grade robotic technology
- Patented polymer-jacketed barrel
- Patented Whisper® sound-dampening technology
- Green manufacturing facility

Own the air with GAMO - the most innovative air rifle manufacturer in the world.

THE RIGHT AIR GUN > THE RIGHT AMMO > THE PERFECT COMBINATION

At Gamo, we manufacture many different air guns to fit the needs of versatile shooters everywhere. With such a variety of choices, we've created the GAMO PROSHOT ID SYSTEM to help you better align your shooting needs with the performance attributes of each model. From Hunting to Pest Control & Recreation to Target & Competition, all Gamo air gun and ammunition packages are clearly labeled and color coordinated to designate their recommended primary usage—so you can easily pair the right ammo with the right air gun. Every time.

GAMO PRODUCT RECOMMENDED USAGE

PEST CONTROL + RECREATION

Provides accuracy and high velocity—ideal for nuisance animals such as mice, rats, birds and snakes. Also perfect for recreational shooting and other everyday uses.

HUNTING

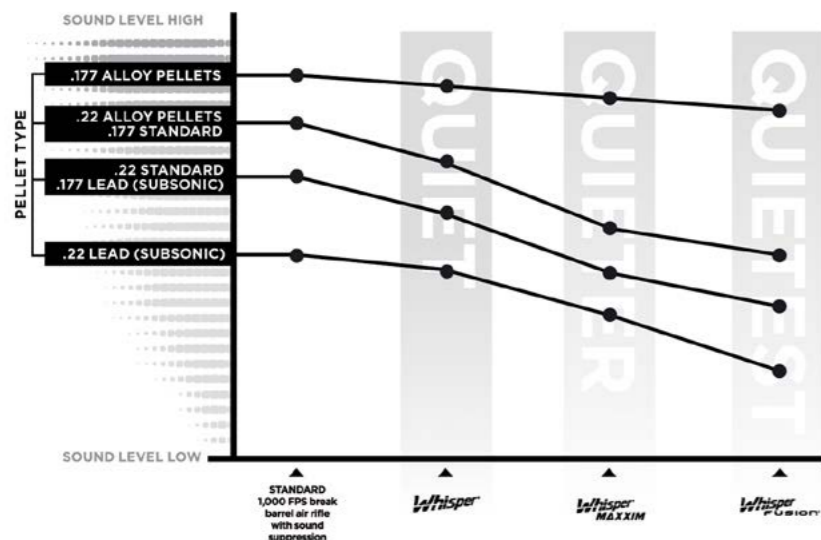

Delivers accuracy with higher energy downrange for ultimate impact and penetration—ideal for small game such as rabbits, squirrels, raccoons, and crows.

TARGET + COMPETITION

Offers the ultimate in accuracy and consistent performance—ideal for both training and competitive shooting.

All velocities have been measured with PBA (Performance Ballistic Alloy) pellets.

Sound suppression technology and sound levels

Gamo's patented Whisper® technology leads the air rifle industry in sound suppression. This technology is categorized into three tiers—Whisper, Whisper Maxxim and Whisper Fusion—for quiet, quieter, and quietest performance. However, “noise reduction” does not mean “silence,” as sound levels will vary depending upon pellet choice. A lighter, faster and smaller caliber pellet, for instance, will produce a louder sound than a heavier, slower and higher caliber pellet. To further assist with your purchasing decision, please refer to the chart above.

Whisper® is a trademark of and is used under license by J. D. Jones. Fusion® is a Registered Trademark of Federal Cartridge Company. Used under license. Fusion® is a Registered Trademark of Federal Cartridge Company. Used under license.

10x Quick-Shot Rapid Reload Technology

Our patent-pending technology enables you to shoot up to 10 pellets without reloading. Simply break the barrel and fire for lightning-quick follow-up shots. This technology is available only in select Gamo air rifles.

This patent-pending 10X GEN 2 Technology includes our revolutionary horizontal integration, making it lighter, more compact and low profile. The second generation 10X offers a smoother operation and improved accuracy.

Inertia fed. Market leading design. Introducing the third generation of Gamo's exclusive rapid-reload technology. This patent-pending 10X GEN3i technology features a sleek and stylish design combined with our horizontal inertia fed magazine integration. The magazine indexes using the inertia force from the recoil of the air rifle - creating a smoother and more precise breech-loading process.

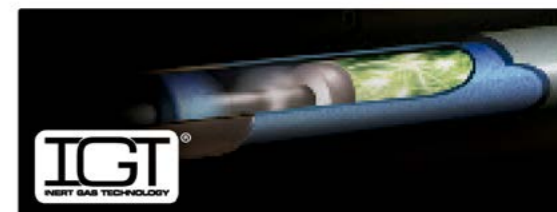

Inert gas technology and recoil

Based off the groundbreaking IGT platform, the IGT MACH 1™ replaces the standard spring powerplant with an Inert Gas Cylinder, but the IGT MACH 1's monster 33 millimeter cylinder delivers more velocity and terminal penetration. The pneumatic cylinder rockets pellets up to 1650 Feet Per Second (fps) in .177 caliber (with alloy pellets), and promotes smooth and consistent cocking efforts with constant power delivered to any pellet you shoot.

Improve your knockdown power and accuracy! Enhance your hunting experience! The IGT™ (Inert Gas Technology™) from Gamo enhances your hunting or target shooting experience. This technology consists of a pneumatic cylinder that replaces the spring, enabling the shooter to get more terminal velocity (up to 1,300 fps with .177 Cal. alloy pellets and up to 1,000 fps with .22 Cal. alloy pellets), less vibration, more consistent power, and a constant and smooth cocking effort.

Gamo, pioneering the latest air gun technology, delivers the groundbreaking Triple R (Recoil Reducing Rail). The RRR was developed to subdue the taxing stresses placed on your scope from the intense recoil of air guns and high-powered rifles. The Recoil Reducing Rail uses patent pending two-piece aluminum construction separated by dual polymer struts to absorb the shockwaves generated by the recoil. Once the scope is mounted to the Recoil Reducing Rail, the recoil stresses to its internal components are reduced by almost 100%.

Trigger technologies

CAT

The revolutionary C.A.T. (Custom Action Trigger) enables Gamo air rifle owners to independently adjust the 1st and 2nd stages of their trigger to tailor the trigger pull and crispness to their personal preference. Simply loosen the 1st stage adjustment screw and the trigger travel increases. If a shorter travel length is desired, just tighten the same screw to decrease the 1st Stage travel length. The 2nd Stage Adjustment is made just as easily—unscrew the adjustment setting to increase the 2nd Stage travel length or decrease it by screwing in the same adjustment point.

The SAT is a patent-pending trigger developed by Gamo and incorporated into several Gamo airguns. This trigger helps the shooter acquire a more precise shot. It is a custom trigger designed for hunting and target shooting that will make you shoot like a pro! It features a smooth action pull, maximizes pinpoint accuracy and feels crisp and clean.

SAT

SMOOTH ACTION TRIGGER

Multishot

10 shots, 0 reloads. With a 10X rotary reloading system that allows up to ten shots to be fired without touching a single pellet.

Three different generations of this technology are now available

GAMO Air Pistols

Quality in the palm of your hand

Air pistols, also known as BB pistols or pellet guns, use compressed air or carbon dioxide (CO2) to propel the ammunition through the barrel. Gamo offers a wide variety of compressed air and CO2 pistols and revolvers. Manufactured under the same quality standards as Gamo air rifles, our pistols stand out for their speed, power, and accuracy.

RED ALERT

A different way to enjoy an air pistol

The Gamo Red Alert CO2 pistols are a wonderful replica, a timeless design of high quality and magnificent precision, at an affordable price. Semi-automatic, powered by 12 g CO2 cylinders. These models are high quality and realism: it is practically impossible to differentiate it from the real weapon. Made in Full Metal.

GAMO Pellets

The feed that your airgun needs

Gamo Pellets, manufactured in lead or alloy (PBA), they have different weight and design configurations in order to adapt to the needs of each shooter. Gamo is the world's largest manufacturer of pellets. Our goal is to produce the highest quality and best grouping pellets on the market. Each pellet is verified by shooting several sample units in each batch.

Technical Properties

Layers

The three layers combination will help you to control your body temperature, selecting each of them as per the weather variations.

First Layer

This is the layer closest to the body, keeping you dry and warm during the colder seasons. We also have light layers made with bamboo fibre which act as thermal regulators.

Mid Layer

This second layer provides good insulation and keeps you warm. Breathable, water resistant and wind breaker. Different weights are available to allow you to adapt to different temperatures.

Third Layer

The external layer that provides the most protection from cold winds and humidity. Moves silently and features a membrane for excellent water resistance and breathability.

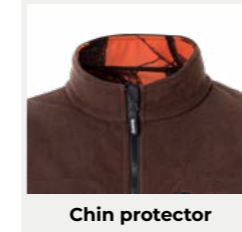

Jackets

Model X45S / X55S

7603 Cal. 4.5 29J

760355 Cal. 5.5 29J

Built on water-based varnished wooden stocks, Winchester's Models X 45 S / X 55 S stand out both for its sublime details and outstanding power. These new air rifles include a 33mm oversized chamber which provides massive power while keeping an optimum precision level. Winchester's Models X 45 S / X 55 S feature the brand's recoil dampening rail.

Air Rifles

Model X45 / X55

7602 Cal. 4.5 29J

760255 Cal. 5.5 29J

Built on water-based varnished wooden stocks, Winchester's Models X 45 / X 55 stand out both for their sublime details and outstanding power. These brand new air rifles include a 33mm oversized chamber which provides massive power while keeping an optimum precision level. Winchester's Models X45 / X 55 feature the brand's recoil dampening rail.

Model 45 RS / 55 RS

7601 Cal. 4.5 24J

760155 Cal. 5.5 24J

Winchester's Models 45 RS / 55 RS are classic style air rifles composed of a last generation rifled steel barrel and a water-based varnished wooden stock that has been laser engraved to provide a perfect grip. These modern classics include a last generation threaded silencer and recoil dampening rail.

Model 45 / 55

7600 Cal. 4.5 24J

760055 Cal. 5.5 24J

Winchester's Models 45/55 have been conceived as the brand's entry-level premium spring-piston air rifles. Winchester's models 45 / 55 feature an ambidextrous laser-marked stock which makes them easy to use for any shooter in the household. Ideal for target shooting and backyard plinking.

Special CO2 Revolver Cal. 4.5

6111400

Cal. 4.5

2.5J

Winchester's new 4.5 Special revolver is an extremely realistic full metal CO2 gun. Powered by a 12g CO2 cartridge, its swining-out cylinder holds a rotatory magazine with 8 shots. Once you have shot all 8 pellets, use the gun's ejection rod to push out the magazine and put a new one on, as in speedloader. The rear sight is fully adjustable, so you might see a significant increase in your short distance shooting accuracy.

Model 11 CO2 Pistol Cal. 4.5

982011-902

Cal. 4.5

3J

There's no need to go to the range or drop a load of cash on expensive firearm ammo to experience the fun of shooting a semi-automatic pistol with blowback action. In most locations, you can shoot the Winchester Air Pistol Model 11 semi-automatic pistol at a target box indoors or in the backyard. You'll love the 1.9 lb. heft of this metal CO2 powered pistol and the realistic blowback action. Just load the 16-shot BB clip and get ready to hone your marksmanship skills.

Flat-Nosed

Winchester's Flat-nosed lead pellets feature a flat tip pattern. This classic design has been considered the most accurate format for many years, so it has been widely used as a standard in precision competitions. The Flat-Nosed format is considered the best option for short distance shooting due to its remarkable grouping and precision.

9874152

Cal. 4.5

0.49g (7.56g)

Hollow Point

Winchester's Hollowpoint pellet presents the main virtues of the Flat-Nosed design, such as a high precision at short and medium distance shooting and at the same time offers excellent expansion capacity. This format has been developed with the aim of providing greater power of impact and penetration at lower speeds.

9874182

Cal. 4.5

0.49g (7.56g)

Pointed

Winchester's Pointed pellet can be defined as a sharp and destructive projectile, capable of offering a relentless penetration, which is really useful when practicing outdoor disciplines such as small game hunting. This type of pellet is widely used in high-powered airguns, specially conceived for varmint hunting and pest control.

9874162

Cal. 4.5

0.49g (7.56g)

Round Nose

Winchester's Round nose pellet is characterized by a rounded tip, which provides an efficient and balanced weight distribution. This particular shape also reduces wind resistance, which allows us to shoot with great precision.
